Programme
Structure

Programme Aims

Upon successfully completing the programme, students should be able to:

- ⊕ Meet current and emergent needs of the clients, the health care delivery system and the community;
- ⊕ Be able to think analytically and critically, be self-directing and culturally sensitive;
- ⊕ Apply a holistic approach of health to nursing practice and to act as change agents;
- ⊕ Acknowledge and apply evidence-based practice in their day-to-day professional activities;
- ⊕ Become Registered Nurses (General/Psychiatric) in Hong Kong.

Programme Features

+ Simulated Learning Environment

Provide a risk-free Clinical Nursing Education Centre for learning nursing skills from the basic to advanced level.

+ Advanced Technology

Implement advanced technology to enhance the learning experience, such as VR & Digital Virtual Dissection System.

+ Electronic Teaching and Learning

Provide digital devices to students during practicum to access the learning materials and complete the clinical assessment via system conveniently.

+ Comprehensive Bio-psychosocial Model

- Include the diverse perspectives of mental health.
- Provide the basic framework for understanding mental health and mental illness.
- Emphasize the specialized field of mental health nursing.
- Equip students to provide high-quality care for individuals experiencing mental health challenges.

Career Prospects & Professional Recognition

Upon successful completion of the Bachelor of Nursing with Honours in General Health Care or Bachelor of Nursing with Honours in Mental Health Care programmes, graduates are eligible to register as **Registered Nurses (General)** or **Registered Nurses (Psychiatric)** respectively with the Nursing Council of Hong Kong.

Registered Nurses (General/Psychiatric) in Hong Kong normally worked at:

General Health Care Graduates	Hospitals, Clinics, Rehabilitation Centres and Residential Care Homes
Mental Health Care Graduates	Hospitals, Psychiatric Clinics, Community Mental Health Centers, Rehabilitation facilities, and Residential Care Homes

With increasing clinical experience, graduates will have the opportunity to pursue the following professional paths:

Advanced Practice Nurse: Graduates can progress to become Advanced Practice Nurses and take on advanced practitioner roles. In these positions, they will implement advanced nursing practices, interventions, and therapies for individuals with general or mental health conditions. Additionally, they will have the responsibility of supervising junior nurses and ensuring the delivery of high-quality care.

Ward Manager: Graduates can advance their careers by taking on the role of a ward manager. As a ward manager, they will oversee a working unit within a healthcare setting. They will be responsible for managing the operations of the ward.

Nurse Educator: Graduates can choose to pursue fulfilling careers as educators in nursing. They can engage in teaching activities within educational institutions, sharing their knowledge and skills with future generations of nurses.
